英 語

令 和 8 年 度 (前期)

注 意

1. 「解答はじめ」というまで、この問題冊子を開いてはいけない。
2. 問題は1冊(本文9ページ)、解答用紙は3枚である。
3. 全部の解答用紙に受験番号を書くこと。受験番号は次の要領で明確に記入する。

(例) 受験番号 80001 番の場合 →

8	0	0	0	1
---	---	---	---	---

4. 解答は解答用紙の所定の位置に書くこと。他の所に書くと無効になることがある。解答用紙の裏面は使ってはならない。字数などの指示がある場合は、その指示に従って書くこと。解答文は横書きとする。
5. 書き損じても、代わりの用紙は交付しない。
6. 試験終了後、問題冊子は持ち帰ること。

I 次の英文を読み、下の問いに答えなさい。（＊を付した語句には、問題文の末尾に注がある。）

Leafy greens like kale and spinach are full of fiber, vitamins, and minerals, and nutritionists want to see us eating more of them to prevent chronic disease. But turning this rabbit food (あ) a delicious dish takes patience and skill that some people lack. If you aren't up for dealing with food prep and cleanup, you can go for days without eating anything green. Just 1 in 10 of Americans meet the daily recommendations for veggies, which is 2-4 cups a day.

Now a silly food hack has emerged on TikTok to make eating them easier: People have taken to shoving handfuls of greens into their mouths, sometimes straight from the bag, so they can get all of the nutrients — fiber, vitamins C and K, calcium, iron — with minimal effort. The trend has been dubbed “Dinosaur Time”, and it was started by a former middle school science teacher in California named Amy Garrett, who uses the TikTok handle @sahmthingsup and has nearly 50,000 followers. During her baby's naptime, Garrett films videos of herself chomping down on romaine lettuce or spinach while she stands over her kitchen sink and the *Jurassic Park** theme plays in the background. These TikToks have been shared over 200,000 times and inspired others to incorporate Dinosaur Time into their diets.

Leafy greens are among the most nutritious of foods, (A) compared to other fruits and vegetables, says Julie Stefanski, a registered dietician in Pennsylvania. Eating them regularly helps decrease the risks of heart disease and certain cancers. Studies have also found that they can slow age-related cognitive decline and help people maintain bone density. So the more you can get them in your diet the better, says Stefanski, even if your meal isn't exactly elegant. “We often strive for so much perfection with food or cooking techniques, and it's really not necessary.”

Garrett said she first started doing Dinosaur Time when she was doing

CrossFit* semi-competitively and was struggling to hit her daily nutrition goals. Another athlete shared that they accomplished this by eating handfuls of plain greens before meals; Garrett gave it a try and found that taking the big, messy bites of raw spinach, bok choy, or microgreens was both easy and made her feel (い) a monstrous herbivore*. Now a stay-at-home mom with limited time, she's picked up Dinosaur Time again. "Instead of feeling guilty about not eating vegetables, I'll just shove them down my face and eat what I normally eat without any guilt," she says.⁽²⁾

One group on TikTok that seems to really enjoy Dinosaur Time is parents with kids. That doesn't surprise Stefanski, who used to work with kids with autism* and sensory processing disorders*, which can lead to selective eating. She says one of the few things children can control is what they eat and they can hesitate to try a new food because they don't like how it looks or feels. By pretending to be giant reptiles, kids touch vegetables that they might otherwise avoid — which is a win, even if they don't end (っ) eating anything since they're still exploring a new food.

"Giving kids the space to do that on their own is so important," Stefanski says. Stefanski doubts Dinosaur Time will become a permanent fixture in most peoples' diets as most food trends eventually go extinct. However, if you hate doing dishes then Dinosaur Time might be worth a try.

(B), Stefanski doesn't want people to replace their meals with large quantities of raw greens. Dinosaur Time should be additive to people's normal eating patterns, not a weight-loss strategy. Garrett agrees, which is why she shows what she's eating for lunch at the end of each TikTok video. Recent meals include barbecued chicken, a tuna sandwich, and spicy kebab.

Emma Longsjo of Boston says that's part of Dinosaur Time's appeal. She grew up doing ballet and felt pressure to be thin; as an adult, she tries to avoid social media content that combines health with body image. But with Dinosaur Time, she knows she's doing something good for her body, that's also kind of

fun. “The first time I was thinking of that scene in *Jurassic Park* where they’re seeing the long neck one, where he’s like, chomping on the trees,” says Longsjo, referring to when the stunned scientists first encounter a brachiosaurus*. (C), Longsjo has finished off three bags of spinach because of Dinosaur Time and plans to buy a fourth this week.

注 *Jurassic Park* 1993 年公開の恐竜映画

CrossFit アメリカ発祥のトレーニング法

herbivore 草食動物

autism 自閉症

sensory processing disorders 感覚処理障害

brachiosaurus ブラキオサウルス(発見されたなかで最大の恐竜)

1 下線部(1)について、その具体的な方法と複数の利点を、本文の内容に即して 100 字以内の日本語(句読点を含む)で説明しなさい。

2 下線部(2)を和訳しなさい。

3 空欄(A)～(C)に入れるのに最も適した語句をそれぞれの選択肢から 1 つ選び、その記号を解答欄に書きなさい。

(A) イ as if

□ even less

ハ even when

ニ if not

(B) イ To be clear

□ To begin with

ハ To make matters worse

ニ To say the least

(C) イ At first

□ In the future

ハ So far

ニ Unfortunately

4 空欄(あ)～(う)に入れるのに最も適した語句を次の中からそれぞれ 1 つ選び、その記号を解答欄に書きなさい。ただし、同じ語が 2 つ以上の空欄に入ることはない。

イ into

□ like

ハ off

ニ up

ホ with

Ⅱ 次の英文を読み、下の問いに答えなさい。（*を付した語句には、問題文の末尾に注がある。）

Though it's a hard thing to establish scientifically, we're almost certainly much more impatient than we used to be. Our decreasing tolerance for delay is reflected in statistics on everything from road rage* and the length of politicians' handouts to the number of seconds the average web user is prepared to wait for a page to load. (It has been calculated that if Amazon's first page loaded one second more (あ), the company would lose \$1.6 billion in annual sales.) And yet at first glance, this seems exceedingly strange. Virtually every new technology, from the steam engine to mobile broadband*, (A) more quickly than before. Shouldn't this therefore have *reduced* our (B), by allowing us to live at something closer to the speed we'd prefer? Yet since the beginning of the modern era of acceleration, people have been responding not with satisfaction at all the time saved but with increasing distress that they can't make things move faster still.

This is another mystery, though, that's illuminated when you understand it as a form of resistance to our built-in human limitations. The reason that technological progress intensifies our feelings of (B) is that each new advance seems to bring us closer to the point of overcoming our limits; it seems to promise that *this* time, finally, we might be able to make things go fast enough for us to feel completely in control of our unfolding time. And so every reminder that in fact we *can't* achieve such a level of control starts to feel more unpleasant as a result. Once you can heat your dinner in the microwave in sixty seconds, it begins to seem genuinely realistic that you might be able to do so (い), in zero seconds. And this makes it all the (C) unbearably frustrating that you still have to wait an entire minute instead.

(D) will it make much difference, unfortunately, if you personally managed to achieve the inner peace to avoid this kind of reaction, because you'll

still end up suffering from *social* (B)—that is, from the wider culture's rising expectations about how quickly things ought to happen. Once more people believe that one ought to be able to answer forty emails in the space of an hour your continued employment may become dependent on being able to do so, regardless of your feelings on the matter.

There may be no more vivid demonstration of this growing sense of discomfort, of wanting to hasten the speed of reality, than what's happened to the experience of reading. Over the last decade or so, more and more people have begun to report an overpowering feeling, whenever they pick up a book, that gets labeled “restlessness” or “distraction”—but which is actually best understood as a form of (B), a strong dislike of the fact that the act of reading takes longer than they'd like. “I've been finding it harder and harder to concentrate on words, sentences, paragraphs”, laments Hugh McGuire, the founder of the audiobook service LibriVox and (at least until recently) a lifelong reader of literary fiction. “Let (E) chapters. Chapters often have page after page of paragraphs.” He describes what's shifted in the (う) delicious experience of sliding into bed with a book: “A sentence. Two sentences. Maybe three. And then... I needed just a *little* something else. Something to scratch the itch at the back of my mind—just a quick look at e-mail on my iPhone; to write, and erase, a response to a funny tweet from a favorite author; to find, and follow, a link to a good, really good, article in *The New Yorker**...”

People complain that they no longer have “time to read”, but the reality, as the novelist Tim Parks has pointed out, is (羨) that they literally can't locate an empty half hour in the course of the day. What they mean is that when they do find a little bit of time, and use it to try to read, they find they are too impatient to commit themselves to the task. “It is not simply that one is interrupted,” writes Parks, “it is that one is actually *inclined* to interruption.” It's ⁽²⁾ not so much that we are too busy, or too easily distracted, but that we are unwilling to accept the truth that reading is the sort of activity that largely

operates according to its own schedule. You can't hurry it very much before the experience begins to lose its meaning; it refuses to consent, you might say, to our desire to exert control over how our time unfolds. In other words, and in common with far more aspects of reality than we are comfortable acknowledging, reading something properly takes just the time it takes.

注 road rage 運転中のストレスでドライバーがカッとなること

broadband 無線通信回線を利用した高速インターネットサービス

The New Yorker アメリカの雑誌

1 下線部(1)が指す内容として最も適切なものを次の中から1つ選び、その記号を解答欄に書きなさい。

イ 人間には集中力の衰えが起こること。

ロ 人間には時間を支配できないこと。

ハ 人間の運動能力には限界があること。

ニ 人間の技術開発に歯止めがかかっていること。

2 下線部(2)の理由を、文章全体の内容を踏まえて80字以内の日本語(句読点を含む)で説明しなさい。

3 空欄(あ)～(え)に入れるのに最も適切な語を次の中からそれぞれ1つ選び、その記号を解答欄に書きなさい。ただし、同じ語が2つ以上の空欄に入ることはない。

イ formerly

ロ instantaneously

ハ rarely

ニ slowly

ホ unfortunately

4 空欄(A)に入れるものとして、次の語を最も適切な順に並べ替えたとき、
2 番目と 5 番目に来る語の記号をそれぞれ解答欄に書きなさい。

イ done ロ get ハ has ニ permitted
ホ things ヘ to ト us

5 4 つの空欄(B)には共通の 1 語が入る。それを次の中から 1 つ選び、その
記号を解答欄に書きなさい。

イ conflict ロ depression ハ impatience
ニ insecurity ホ pressure

6 空欄(C)に入れるのに最も適切な英語 1 語を解答欄に書きなさい。

7 空欄(D)に入れるのに最も適切な語を次の中から 1 つ選び、その記号を解
答欄に書きなさい。

イ As ロ Either ハ Less ニ Nor ホ So

8 空欄(E)に入れるのに最も適切な語を次の中から 1 つ選び、その記号を解
答欄に書きなさい。

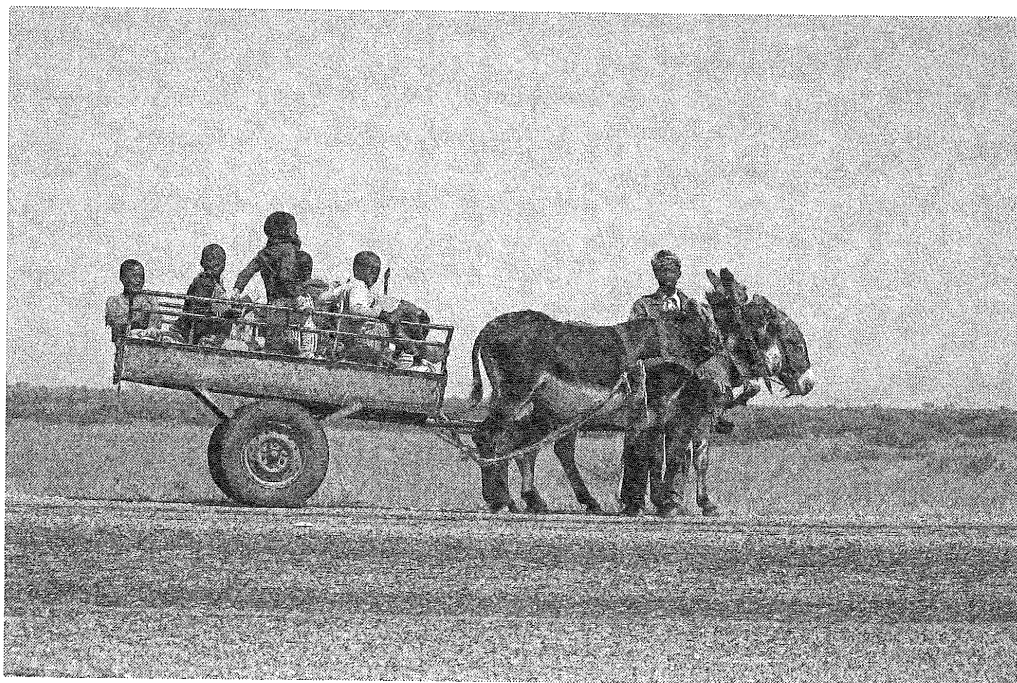

イ alone ロ along ハ altogether
ニ around ホ away

III Choose one of the pictures below and describe it in English. Your description should be 70 to 100 words in length. Indicate the number of the picture you have chosen. *Correctly* indicate the number of words you have written at the end of the composition.
